REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The instant application is allowable over the prior art because the prior art does not teach a combination of an upright parallelepiped frame assembly having wheels attached to its lower end, and a cage assembly abutting and resting on top of the frame assembly, wherein the cage assembly has a horizontal upper wall and a downwardly extending perimeter wall attached to said horizontal wall, so that when said cage abuts said frame assembly, said frame assembly is disposed within said cage. The prior art of record teaches various structures similar to the frame assembly, such as the Collapsible Closet Frame Structure shown in US Patent No. 5,560,502 to Hsiung. Likewise, a cage having a horizontal wall and a perimeter wall extending downwardly therefrom is not unknown in the prior art. Such an assembly is shown in US Patent No. 5,727,700 to Digney. However, where the instant invention differs from the prior art is its combination of the frame and cage assemblies, because as argued by the Applicant, there is no motivation found in the prior art for combining two such assemblies.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
